

BAM-2024 FINAL PROJECT REPORT

You are to critically analyze the data assigned to your group. The report should be developed to give the reader a comprehensive overview of the industry and the data provided.

Group 1	Group 2
Aviation: Global Aviation Industry 2010-2026	Healthcare: Global Healthcare & Pharma 2010-2026

Grading Criteria

Your analysis of the dataset and the team effort used in developing a report that includes visualization dashboards should be based on principles that you have learned in this course and other courses. Use the following criteria to evaluate the data. The following rubric will be used to evaluate your submission.

1. Add a cover page detailing all group members and other necessary details.
2. Your submission should include a responsibility matrix to highlight the contributions of each team member.
3. Download the dataset assigned to your various groups, analyze as a group to identify details that would interest the management, these could also be possible questions the data can answer. Using these details, produce a PDF report of 10 pages that includes visualization/dashboards where necessary. **(to be submitted)**
4. Import the data into Power Query for transformation and cleaning.
Screenshot of before and after of the error/data cleaning **(to be submitted)**
5. Load your data into Power BI and show relationship between tables. (show screenshots).
6. Using your storytelling/narrative skills, incorporate minimum 5 dashboard visualizations, to produce a detailed report that best communicates the result of your analysis.
 - upload a screenshot of your dashboards from Power BI (with the desktop timestamp)
7. Ensure to include references to the source of the data.

This is open from July 22nd – August 12th, 2026.

Presentation – August 14th, 2026
